Overall Morningstar Ranking (Class I)

★★★★★

MCDIX received a 5-Star Overall Rating out of 431 Intermediate Core Bond funds, based on risk adjusted returns derived from a weighted average of the Fund's 3-year Morningstar metrics.

See next page for additional details

Investment Objective

To provide long-term total return.

Investment Strategy

Under normal circumstances, at least 80% of the Series' assets will be invested in U.S. dollar denominated credit-related instruments and other financial instruments, principally derivative instruments and exchange-traded funds (ETFs), with economic characteristics similar to credit-related instruments. The Series will principally invest in investment grade securities, and is not subject to maturity or duration restrictions.

Portfolio Managers

Credit Quality Distribution

	Series	BAB Index
AAA	45.52%	73.36%
AA	1.59%	2.43%
A	19.15%	10.85%
BBB	17.13%	11.65%
Below BBB	--	0.49%
NR/Not Available	16.62%	1.22%

Effective Duration Breakdown

	Series	BAB Index
<1 Year	13.70%	0.53%
1-3 Years	16.50%	24.60%
3-5 Years	28.47%	23.52%
5-7 Years	30.69%	19.27%
7-10 Years	10.34%	16.24%
10+ Years	0.30%	15.84%

Fund Information

	Ticker	Cusip	Inception	Minimum Investment	Gross Expenses	Net Expenses
Class I	MCDIX	56382R183	09/23/2024	\$1M	--	0.50%
Class S	MCDSX	56382R175	09/23/2024	\$2,000	--	0.75%

Class I minimum investment may be waived for certain qualified retirement plans and discretionary investment accounts of the Advisor.

Class S minimum investment may be waived for certain qualified retirement plans, participants in an automatic investment program, and discretionary investment accounts of the Advisor.

Class S net expenses includes a 12b-1 fee of 0.25%, of which up to 0.25% is available as a shareholder servicing fee.

Annualized Performance

	QTD	YTD	1Y	3Y	5Y	10Y	Inception (04/14/2020)
Class I	-1.57%	4.17%	4.17%	-0.49%	--	--	1.34%
Class S	-1.63%	3.91%	3.91%	-0.74%	--	--	1.09%
Bloomberg U.S. Aggregate Bond Index	-3.06%	1.25%	1.25%	-2.41%	--	--	-1.38%
Bloomberg U.S. Intermediate Credit Index	-1.46%	4.01%	4.01%	0.37%	--	--	1.27%

Performance data quoted represents past performance and does not guarantee future results.

Performance for periods greater than one year is annualized. The investment return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than that quoted; investors can obtain the most recent month-end performance at www.manning-napier.com or by calling (800) 466-3863.

*Class S and Class I performance is based on the Credit Series Class W inception of 04/14/2020. For periods through 09/23/2024 (the inception date of the Class S and I shares), performance for the Class S and Class I shares is hypothetical and is based on the historical performance of the Class W shares adjusted for the Class S and Class I shares' charges and expenses.

30-Day SEC Yield (as of 12/31/2024)

	Yield
Class I	4.38%

If fees had not been waived, the 30-day SEC Yield (as of 12/31/2024) would have been 4.36% for Class I.

Sector Allocation

What You Should Know About Investing

All investments involve risks, including possible loss of principal. There is an inverse relationship between bond prices and interest rates; as interest rates rise, bond prices (and therefore the value of bond funds) fall. Likewise, as interest rates fall, bond prices and the value of bond funds rise. Investments in derivatives can be highly volatile and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. Also, the use of leverage increases exposure to the market and may magnify potential losses.

Fund Commentary

The end of 2024 for financial markets was defined by the U.S. presidential election and, subsequently, indications from the Federal Reserve that rate cuts are likely to slow. In the immediate aftermath of President Trump's victory, markets responded in the form of a meaningful rally for U.S. stocks while foreign equities were left behind, posting negative returns. The risk appetite in the U.S. then somewhat cooled upon the hawkish signaling from the Fed, and bond yields finished the quarter higher to conclude a rocky year for fixed income markets but a banner year for risk assets.

The Credit Series posted negative absolute returns for the quarter but outperformed the broad market (as represented by the Bloomberg U.S. Aggregate Bond Index). Negative returns for the quarter were primarily attributable to rising yields. Alternatively, relative outperformance was largely due to the portfolio's lower duration. Duration for the portfolio is a byproduct of where we are finding value in individual credit securities rather than an implicit call on the direction of interest rates. Additionally, exposure to credit-related securities, as well as strong security selection, contributed positively to relative returns.

In terms of positioning, we continue to view securitized debt (i.e., asset-backed and commercial mortgage-backed securities) as relatively attractive and focus on securities with seniority in the capital structure that are backed by asset classes with high-quality fundamentals and low credit risk. Alternatively, we are more cautious on corporate credit as valuations remain elevated. As a reminder, given the strategy's focus on credit-related securities, we do not have exposure to U.S. Treasuries, which represent a significant portion of the broad market index. That stated, we do have a notable allocation to agency mortgage-backed securities.

Going forward, we believe that the path of interest rates is unclear as markets grapple with uncertainty on inflation expectations, increasing fiscal deficits, and the incoming administration's policies towards tariffs and immigration. Overall, we foresee elevated volatility in markets in the coming year. We believe that our active approach to investment management allows us to prioritize risk mitigation while also pursuing select, compelling investment opportunities. As such, we're confident that our processes arm us with the tools we need to navigate a challenging market environment.

Definitions

Duration: A measure of the sensitivity of a fixed income security's price to changes in interest rates. It indicates the expected life of the security and how much its price will change with a 1% change in interest rates. Securities with shorter durations are generally less affected by interest rate changes than those with longer durations.

Credit quality ratings: are measured on a scale that generally ranges from AAA (highest) to D (lowest). Not Rated (NR) is used to classify securities for which a rating is not available. Credit quality ratings reflect the median of Moody's Investors Services and Standard & Poor's ratings. Data obtained from Bloomberg.

For more information about any of the Manning & Napier Fund, Inc. Series, you may obtain a prospectus at www.manning-napier.com or by calling (800) 466-3863. Before investing, carefully consider the objectives, risks, charges and expenses of the investment and read the prospectus carefully as it contains this and other information about the investment company.

The data presented in the commentary is for informational purposes only. It is not to be considered a specific recommendation. Portfolio Composition data for the Series (excluding SEC yield) provided by FactSet. Industry Breakdown is provided by FactSet. Portfolio turnover provided by Morningstar. Cash allocation may vary slightly given the different sources of data. Analysis: Manning & Napier. Investments will change over time. The "Other" category contains securities such as ETFs and others that cannot otherwise be classified.

Manning & Napier Fund, Inc. Credit Series I was rated against Intermediate Core Bond funds and had a 5 star rating for the three year and a 5 star rating overall, as of 12/31/2024, out of 431 and 431 funds respectively. Ratings for other share classes may differ. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36 - 59 months of total returns, 60% five-year rating/40% three-year rating for 60 - 119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Bloomberg U.S. Aggregate Bond (BAB) Index is an unmanaged, market-value weighted index of U.S. domestic investment-grade debt issues, including government, corporate, asset-backed, and mortgage-backed securities, with maturities of one year or more. Index returns do not reflect any fees or expenses. Index returns provided by Intercontinental Exchange (ICE).

The Bloomberg U.S. Intermediate Credit Index measures the investment grade, US dollar-denominated, fixed-rate, taxable corporate and government-related bond markets with a maturity greater than 1 year and less than 10 years. It is composed of the US Corporate Index and a non-corporate component that includes non-US agencies, sovereigns, supranationals and local authorities constrained by maturity. Index returns provided by Intercontinental Exchange (ICE).
